DETAILED ACTION

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the relationship between the spring and the hollow plungers.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- Claims 1-6 and 8-12 are rejected under 35 U.S.C. 102(b) as being anticipated by
 U.S. 5711103 issued to Keng. Keng discloses a bipod device.
- 3. With respect to claim 1, Keng discloses a hollow body 16, 56; a pair of legs 57, 58; a yoke 35; and urging means 76, 77 as claimed by the applicant (col. 5, II. 2-17); and, a bolt connector 71.
- 4. With respect to claim 2, refer to Fig. 1 and col. 5, Il. 2-17.

- 5. With respect to claim 3, refer to Fig. 1 and col. 5, II. 2-17.
- 6. With respect to claim 4, refer to Fig. 2 and col. 5, II. 2-17.
- 7. With respect to claims 5 and 6, refer to col. 5, II. 18-37.
- 8. With respect to claim 8, Keng discloses a hollow body 16, 59; a pair of legs 57, 58; a yoke 35; and urging means 76, 77 as claimed by the applicant (col. 5, II. 2-17); and, a bolt connector 71 and leg housing 56.
- 9. With respect to claim 9, the body 16 includes ledges (the interior of cavity 28) for limiting pivoting of the yoke 35 with respect to said body. The yoke fits within the ledges precluding rotation about the body.
- 10. With respect to claim 10, the yoke 35 has a square body with ledges that mate with the square cavity of body 16. Yoke 35 is precluded from rotating with respect to said body 16.
- 11. With respect to claim 11, refer to col. 5, II. 31-37.
- 12. With respect to claim 12, Keng discloses a connecting means comprising a tie element 71 received within body 59 and pivotally connecting the first ends of legs 57, 58.
- 13. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. 4607561 issued to Frimer. Frimer discloses a firearm rest comprising a hollow body 10; a pair of legs 32, 34; a yoke 14; and urging means 33, 35 and elements of Fig. 4.

Claim Rejections - 35 USC § 103

14. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 15. Claims 5, 6, and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frimer in view of U.S. 4625620 issued to Harris. Frimer discloses a bipod as described above. However, Frimer does not disclose the telescoping legs as in claims 5-7. Harris discloses such legs including a spring-loaded button 51 that must be pushed to collapse each leg. (See figs. 5 and 7; col. 3, II. 62 to col. 4, II. 5). At the time of the invention, one of ordinary skill in the art would have found it obvious to provide the bipod of Frimer with the telescoping legs of Harris. The suggestion/motivation would have been to allow for the adjustment of leg height.

Allowable Subject Matter

- 16. Claim 13 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
- 17. Claims 14-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
